

## Why should your institution sign up?

EZCompetency cuts down on time, paper and mailing costs. We have a high success rate of physicians completing modules on time. A Physician's completed module may apply to several institutions. Furthermore, all reminder emails and test reports are automatic. Physicians have access to a time-saving comprehensive overview of each model. Lastly, modules are smartphone and tablet compatible.

## What is EZCompetency?

The institutional administrator will receive a report on the current status of the modules whether they are completed, past due, not assigned, or expired.

A module is past due when they have not completed the module by the due date. The due date is 30 days prior to the expiration date when their privileges expire. You will have the capability to change the expiration date. Here are the modules available:

**Moderate Sedation**  
**Deep Sedation**  
**Pediatric Sedation**

**Basic Life Support**  
**Advanced Life Support**  
**Neonatal Life Support**  
**Pediatric Life Support**

**Fire Safety**  
**Radiation Safety**  
**Rapid Sequence Intubation**

EZCompetency is an online system to provide a quick, automatic and easier method to maintain non-core competency for providers in the following areas:

**Sedation: Pediatric, Moderate, Deep**  
**Life Support: Pediatric, Neonatal, Basic, Advanced**  
**Safety: Fire, Radiation**  
**Rapid Sequence Intubation**

EZ Competency works by sending email notices to physicians and nurses on pending modules that the institutional administrator has assigned to them.

**Available**  
**modules for**  
**your institution**

**Get started on**  
**EZCompetency**  
**today**

Sign up your institution and set up your preferences on reminder emails to complete modules. Lastly, enter the physicians and nurses to eliminate all the bothersome paperwork and make it easy.
